

LEVEL PRODUCTS.

CLEAR VISIBILITY.

CONFIDENT PROCESS CONTROL.

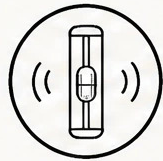

— PRESENTER: GLOBE UNITED FZE —

MAGNETIC LEVEL GAUGES

sealed indication, clear reading.

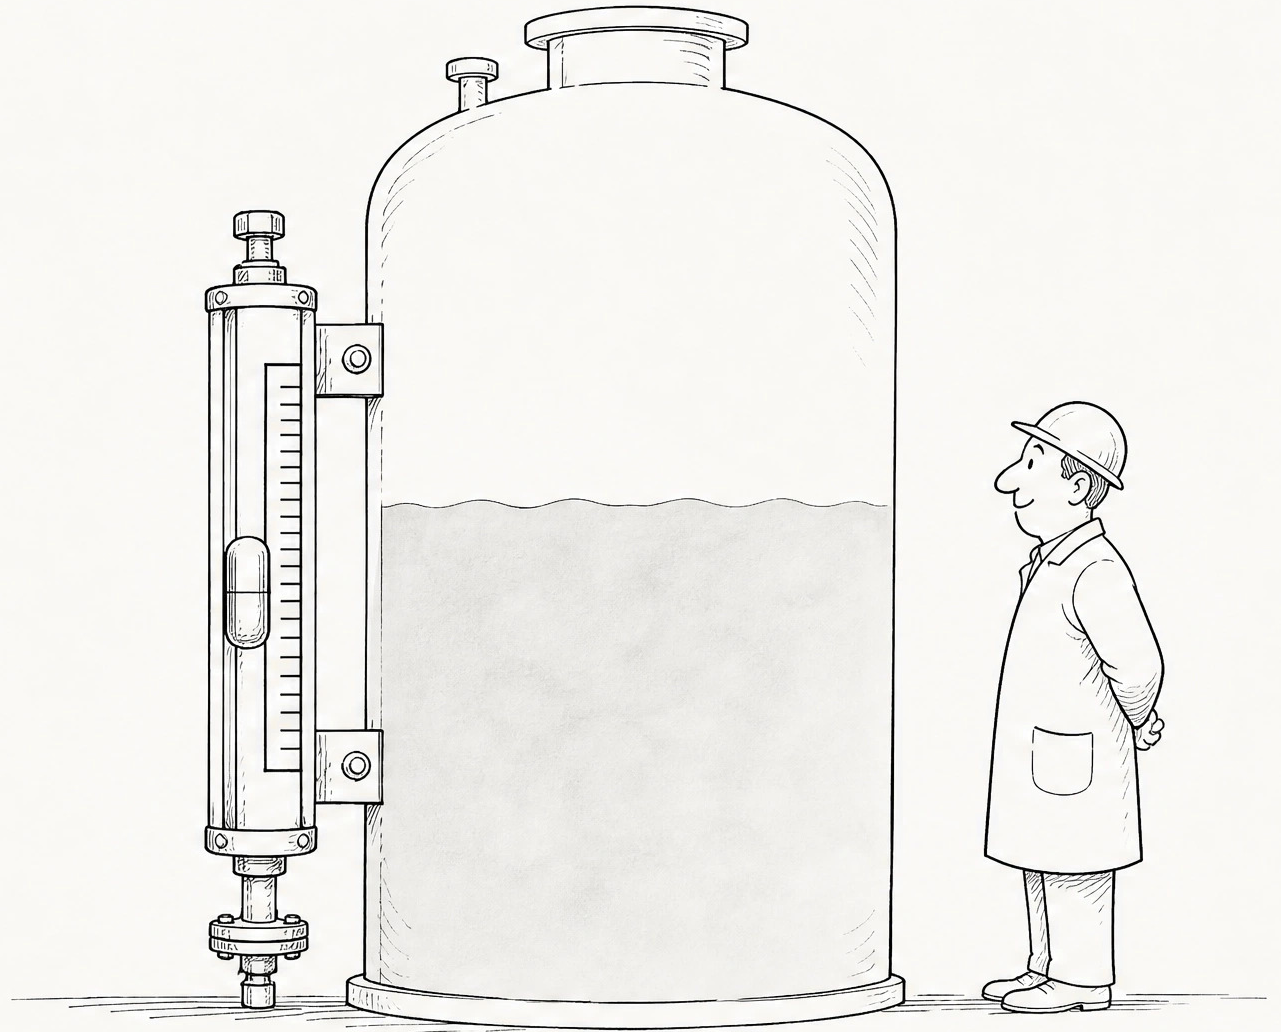

SEALED TUBE WITH MAGNETIC FLOAT
for clear, distant reading.

ROBUST, CORROSION-RESISTANT
for hazardous/high-temp fluids.

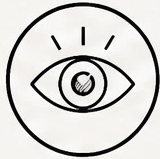

MAINTENANCE-FREE:
*no moving parts contact
the process liquid.*

**Globe
United**

TRANSPARENT LEVEL GAUGES

see the liquid directly.

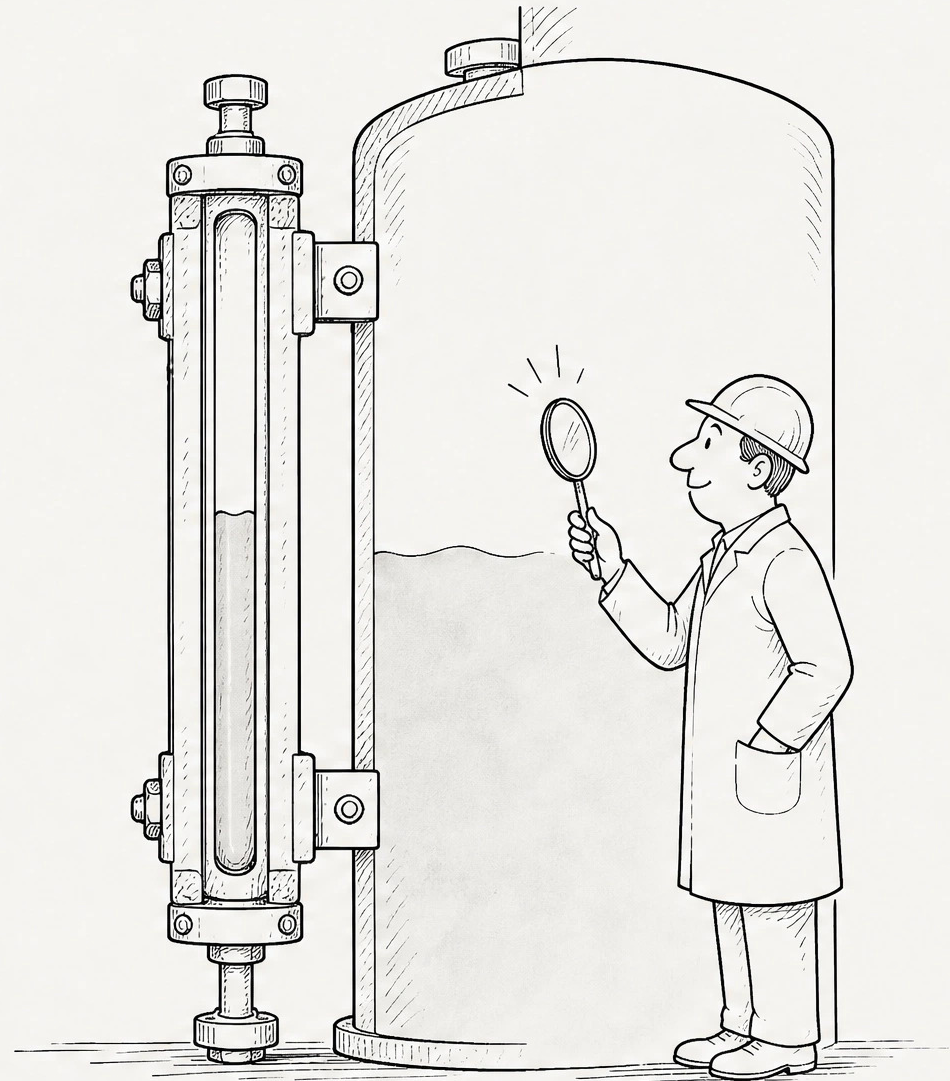

TRANSPARENT GLASS *enables immediate, unobstructed visual observation of liquid level in the vessel.*

BOROSILICATE GLASS AND STAINLESS-STEEL CONSTRUCTION *support use in harsh, high-temperature, high-pressure, and corrosive applications.*

PROTECTIVE SHIELDS AND REMOVABLE GLASS *make safety and inspection integral to the design.*

**Globe

REFLEX LEVEL GAUGES

instant liquid/vapor contrast.

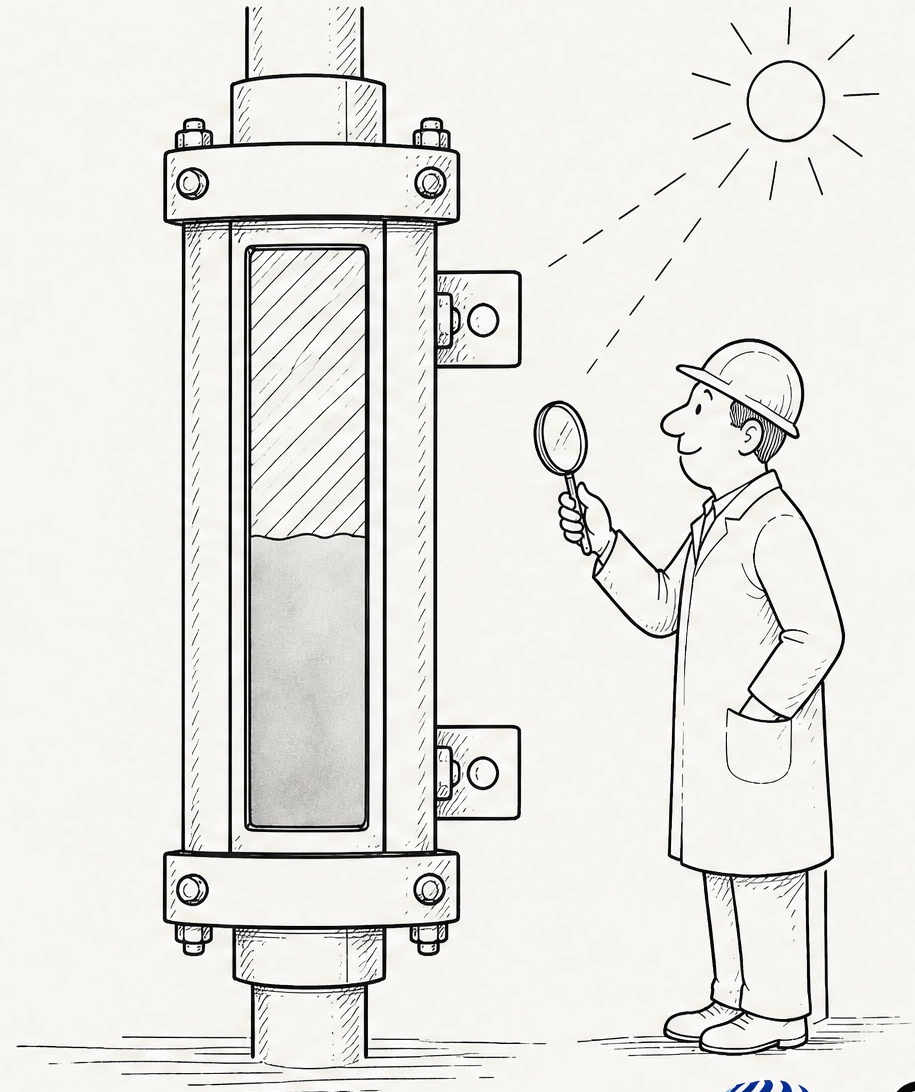

PRISMATIC GLASS REFLECTS
*light in vapor space, absorbs in
liquid space for clear distinction.*

HIGH CONTRAST FOR QUICK READING;
RUGGED FOR HIGH PRESSURE/TEMPERATURE
AND CORROSIVE SERVICE.

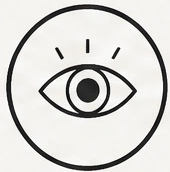

PROTECTIVE SHIELDS AND
REPLACEABLE GLASS
simplify maintenance.

Tubular Level Gauges

— *the simple line of sight.*

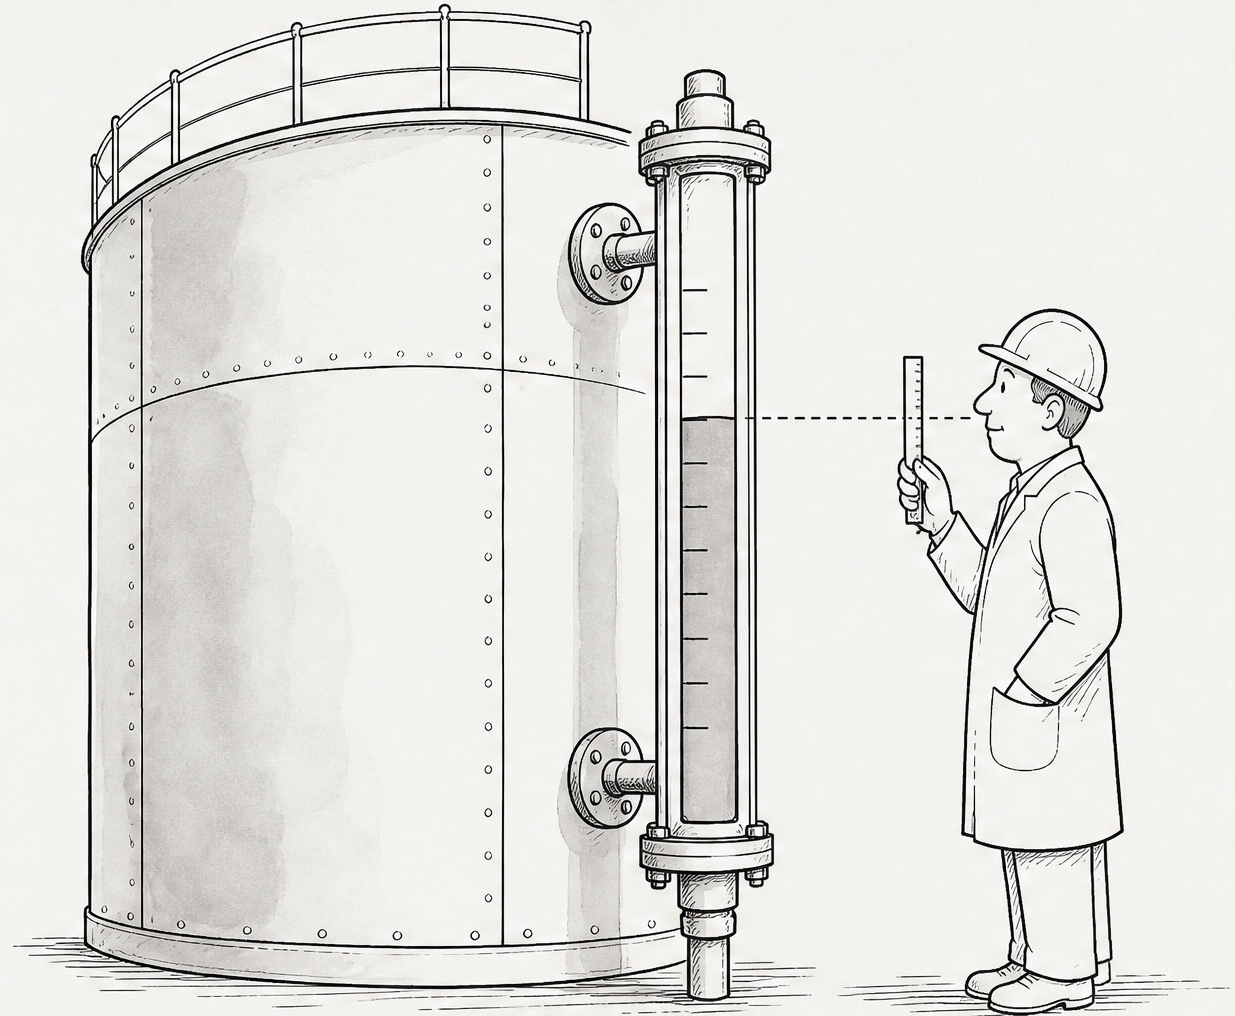

A transparent tube mounted outside the tank rises and falls with the vessel level, providing real-time direct visibility.

Its straightforward construction supports easy installation and maintenance while avoiding complex electronics or sensors.

Globe United positions the tubular design for varied industrial environments, from chemical processing and water treatment to oil and gas, pharmaceuticals, and food processing.
